S I R :

Responsive to the Restriction Requirement dated **January 29, 2003**, Applicants elect to prosecute Group I (claims 1-5, 9-10 and 12-13, drawn to unique indications including distinctive ringing or activating LEDS) without traverse.

Please amend the above-identified application as follows:

**IN THE CLAIMS:**

Please replace claims 1 and 3 with the following amended claims:

1. (Amended) A telephone apparatus comprising:
- an information detector for detecting transmitted caller information,
  - an operation unit for specifying caller group information which relates to the transmitted caller information,
  - a memory for storing the transmitted caller information and related caller group information,
  - a display unit, and
  - a controller, said controller displays the caller information in said display unit, and searches said memory, and when received caller information coincides with caller information in the memory, , the caller group information
